

## Nature as a project

Our commitment to the preservation of nature that has given us so much and to which we owe so much. Little daily gestures and large-scale farsighted choices out of respect for the environment and the territory we love.

Only **100% Green Energy** from renewable wind sources is used to power everything at the group's headquarters in Palau as well as the 12 hotels, 2 residences and 23 villas. This energy is certified by a guarantee of origin (GdO) issued by the electrical services consortium supplier.

**Structures designed and built in harmony with nature.** Modest low-level buildings that are no more than two storeys high for minimal visual impact in order to integrate with the surrounding landscape.

**Support for the local economy and handicrafts** through giving priority to articles produced by Sardinian and Gallura companies who decorate the rooms in a modern Mediterranean style: artistic ceramics, wrought iron and traditional fabrics including rugs from Aggius, a town renowned for hand weaving and colouring yarns with natural herbs.

Conservation of biodiversity in green areas through the **preservation of indigenous plants and trees**, partly because they require less water, partly because they are better suited to the local context and partly because they are highly perfumed.

**Separated waste collection** at the main offices and all the chain's hotels, resorts, residences and villas.

**Courtesy line and SPA products** are almost entirely eco/bio and paraben free, created using derma-compatible ingredients which are the most suitable for sensitive, intolerant and allergy-susceptible skin types and without using chemical substances that are harmful to humans, animals and the environment.

**Ecolabel products for regular cleaning**, an environmentally friendly European Union quality brand (Ecolabel UE).

## Nature as a project

Automatic turning off of lights and air-conditioners in the majority of the hotel and resort bedrooms.

Exclusive use of electric service vehicles for transporting guests around structures.

Genuine Local Food Oriented® for cuisine based on a selection of healthy ingredients depending on the season and ideally at 0 kilometres: the freshest meat from farms on the Gallura hills, fresh fish caught daily and fruit and vegetables from local producers.

Organic vegetable garden and aviary at the Resort & SPA Le Dune, an educational experience for the youngest guests to learn about and get to know Mediterranean plants and the various stages of cultivation from seed to fruit. Guests collect eggs laid by our free range hens and pick the vegetables that will then be eaten in the Peter Pan restaurant reserved exclusively for children.

Excursions that promote the area and its traditions and which make guests aware of the excellent food and drink found in Gallura. Experiences that encourage the discovery of the little inland communities and their authentic hospitable inhabitants.

Long-standing partner of the Spazzatura Kilometrica event promoted and supported by Striscia la Notizia journalist Max Laudadio and organized by the ON environmental association. This is a team competition in which the squad that collects the most kilometres of rubbish by separating it into plastic, glass and cigarette ends wins a holiday in one of the Delphina facilities.

Corporate Golden Donor together with FAI, the Fondo Ambiente Italiano (Italian National Trust), in the protection of Italy's most beautiful cultural and natural heritage.

Delphina catalogues are printed using mineral oil-free ink on eco-friendly paper certified to FSC (Forest Stewardship Council) or PEFC (Programme for Endorsement of Forest Certification Schemes) standards. The first guarantees that the wood comes from a forest managed according to strict environmental, social and economic standards; the second guarantees the sustainable management of the forests that supply the wood and the traceability of wood products.

Be green, don't print!
